THE WORLD

M.R.A Youth can help

SIR, It is high time that African youth in Joburg, as well as other industrial towns, realised that they are supposed to be an answer to the most difficult problem of the world which can't be solved easily.

The African youth in the far Northern and African states are now showing the world that they can be an answer to a world problem.

There is a revolution of MRA Youth who aim at modernising African youth, regardless of race or colour. The move is known as an African Aim.

Let us have life with inspiration with changed men, men free from hate, fear-free. Come on South African youth, let us contribute something to our nation. Let us modernise the South African youth.
